President

Singapore Marine and Land

Products Association

The Singapore Marine and Land Products Association is one of the oldest in the country, formed in the eighteenth century.

Members of our association trade in high-end seafood and land products. As consumption gradually increases, we are most concerned about supply sources. Our association is undertaking steps to engage the stake players and relevant government agencies on the urgent need to push the implementation of sustainable fisheries methods in line with guidelines set by the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES) and relevant authorities. This will ensure continuous food supplies at affordable prices for our future generations.

We are in consultation with Agri-Food and Veterinary Authority of Singapore (AVA) on the current issues pertaining to our trade.

With its strong support, our members are working cohesively to adhere to guidelines set by CITES and governing bodies to promote compliance in our trade.

We take this opportunity to express our heart-felt thanks and gratitude to the AVA for its guidance and tutorage.

Best wishes on the success of the *Singapore Agri-Food Business Directory 2010*.
